

Whatever your security requirements, our range of commercial tubular fences are guaranteed to meet your high standards.

## COMMERCIAL TUBULAR FENCING

Tubular fencing is a popular choice due to its durability, appearance and ability to provide security. It adds value to your property and can be placed in almost any environment. Tubular fences are commonly used in factories, schools and railway stations.

### SPECIFICATIONS:

Our standard range is listed below. If you can't find anything that suits you, contact us and we'll tailor something to your requirements.

<b>Panel length</b>	2400mm (non std sizes are available on request)
<b>Panel heights</b>	1800mm, 2000mm, 2100mm, 2400mm (non std heights available on request) If your application is for a school and it has a pressed spike, you must use a minimum 1800mm height to comply with Australian Standards
<b>Gate width</b>	1000mm and 3000mm opening (non std sizes available on request)
<b>Design</b>	Face Welded or Punched through the rail they both use 40 x 40mm rails (other options available on request)
<b>Verticals</b>	Std is 25mm x 25mm or 20mm x 20mm (other options available on request)
<b>Post length</b>	2400mm, 2700mm, 3000mm (other lengths are available on request)
<b>Post diameter</b>	65mm, 75mm and 100mm (other options available on request) We do not recommend going anything smaller than a 65mm post with this product due to panel weight
