

Clean lines make slat fencing a beautiful solution. Ideal for screening, alfresco dining areas, shading, pools or feature fencing.

## SLAT FENCING

Constructed from aluminium, it much lighter than steel it is pre-treated before being powder-coated making it resistant to corrosion. It is a durable and low maintenance product that will add value to any property or development. This product is widely used in commercial environments including display and retirement villages. When using this product around a pool, a 10mm spacing between slats must be used to comply with Australian Standards.

### SPECIFICATIONS:

**Panel Length** Panels are custom made so you can request any length. It is advised that you do not exceed 2200mm length per panel as it will make the panel less durable.
